Thirsk

19302/19303

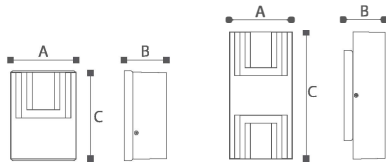

Heartful efforts achieve brilliance. The Light Thirsk is inspired from an ancient long-shaped lantern with partially stepped-shape. It can create a contrastingly special atmosphere by illuminating through lens. Lights can be emitted from single or both sides depending on customers choices. Fixing the light to walls presents a sense of decency and modesty. The dimly yellow light provides customers with beautiful enjoyment as well as a cozy home in a peaceful night.
